ECCLESIA LAW

THE ECCLESIA LAW RESEARCH INSTITUTE

"Where Doctrine Meets Remedy. No Myths. No Pseudo-Law."

EXECUTIVE SUMMARY

This section of Ecclesia Law provides **authoritative research** and **technical analysis on natural and artificial legal persons**, **agency doctrine**, **jurisdiction**, and the **lawful mechanisms** for resolving **debt**, **tax**, and **statutory liabilities.**

Drawing on orthodox English jurisprudence — such as Salomon, the Interpretation Act 1978, executor doctrine, and the Bills of Exchange Act 1882 — our work demonstrates that questions surrounding identity, liability, and legal personality are grounded in mainstream law, not in pseudo-legal speculation.

Unlike sovereign-citizen belief systems, which rely on spiritual declarations, "opting out," or interpretive claims that collapse under scrutiny, Ecclesia Law provides structural, lawful, and compliant frameworks for remedy. Our research shows that true relief requires rebuffing the presumption of agency between the living soul and the birth-certificate-created legal person, and replacing it with fiduciary trust and ministry structures.

This section also analyses competing systems including those that sit in sovereign movements, demonstrating why they fail to achieve operational sovereignty and what does work.
